

## Pole Metal Detector

### Specification :

Dimension:

2020mm(H)X39mm(W)X160mm(D)

Gross Weight : About 24kg

Work environment : -20- +45°C

Complied standards : GB15210-94

Power supply : 100-220V,AC

Power : < 30W

Material of panel : Water-proof ABS

Sensitivity : Adjustable from 0 to 255

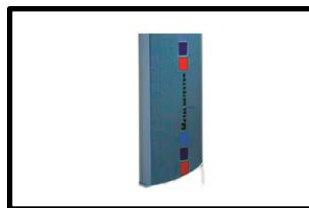

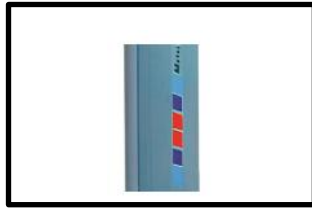

Alarm time : 1-25s

Alarm tone : 10

Alarm volume : 0-255

Frequency : 4-8K

### Product Preview :

## Features :

- Made with strong, waterproof, and lightweight ABS material
- Uses infrared sensor technology with high mechanical interference resistance
- Adjustable sensitivity (0–255) to suit various detection needs
- Ignores small metallic items like jewelry, belt buckles, and zippers
- Includes intelligent counting for number of people and alarms triggered
- Features a thin-film control panel with a high-brightness display
- Shows precise alarm location with both sound and light alerts
- Protected by password authorization for secure access and settings control
- Completely harmless to humans (safe for pacemakers, pregnant women, etc.)
- Plug & play setup – no assembly required
- Ideal for use in hotels, stations, stadiums, exhibition halls, and more
- Modular Design Easy maintenance and part replacement if needed
- Energy Efficient Low power consumption for continuous operation
- Weatherproof Construction Suitable for semi-outdoor environments like station entrances
- Multi-language Support Interface can support various languages (if applicable)
- Integration Ready Can be connected to other access control systems or alarms
- High Throughput Capability Suitable for high-traffic areas without slowing down entry
- Compliance with Safety Standards Meets national and international safety requirements
- Tamper-proof Construction Prevents physical interference or vandalism
- Optional Remote Control/Monitoring Can be managed remotely (if supported)
- Visual Indicators LED indicators for pass/fail zones
- Built-in Battery Backup Ensures operation during power outages (if equipped)
- Silent Mode Option Option for light-only alarms in noise-sensitive environments

## DETAILS :

- 5 detecting zones
- Light weight
- IP55 protection standard.
- Both sides detection
- Dry contact.
