

Model No: TS-TD-02

Products Introduction:

Our Smart Parking Management System is a robust, automated solution designed to streamline vehicle access, enhance security, and improve the user experience in parking facilities. The system supports both Card-Based and Ticket-Based access for Temporary and VIP vehicles, ensuring flexibility and ease of operation for a variety of parking environments, such as shopping malls, office buildings, hospitals, and residential complexes.

Core Applications :

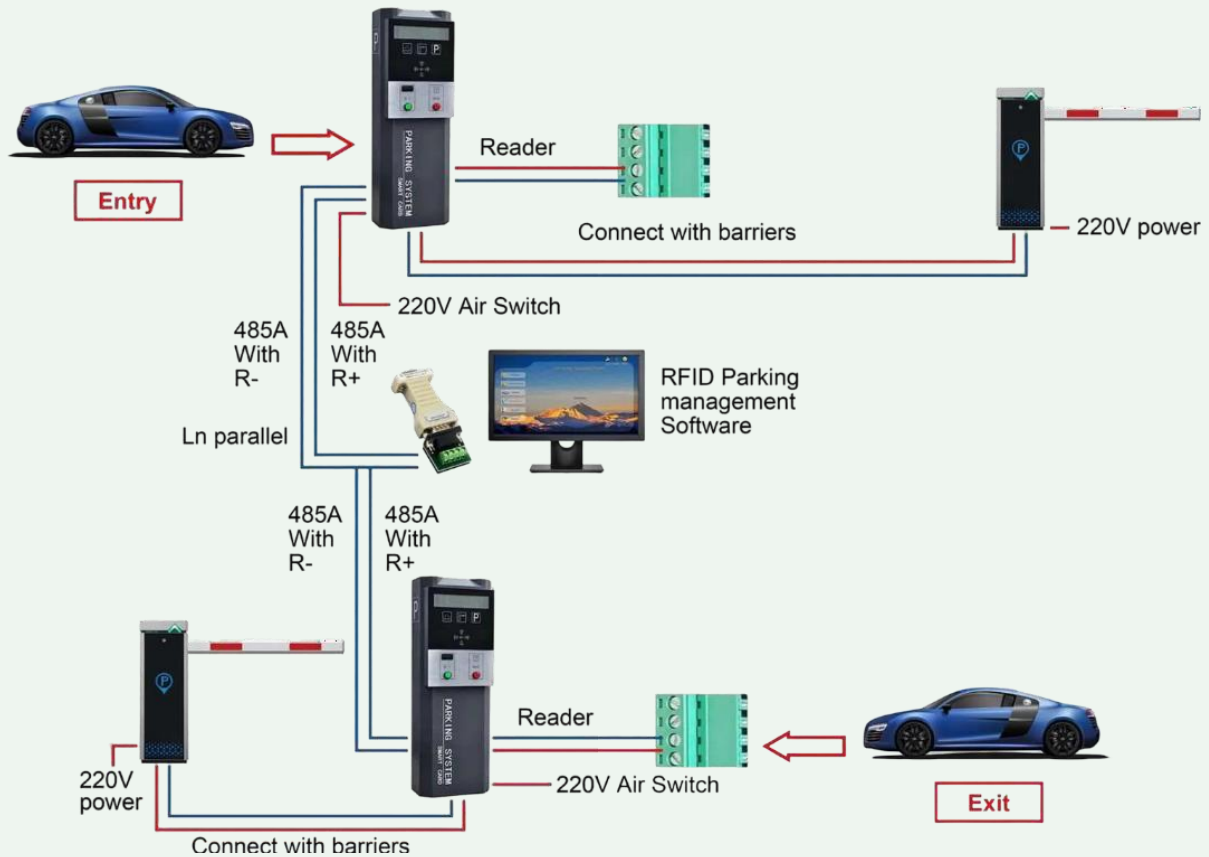

The Smart Parking Management System is ideal for a variety of environments, including shopping malls, airports, hospitals, office buildings, hotels, and residential communities. It handles high traffic efficiently with automated access, supports both short- and long-term parking, and enhances security through VIP card access and real-time monitoring. Whether managing visitor flow in public areas or providing controlled entry for residents and staff, the system ensures smooth, secure, and flexible parking operations.

Benefits :

The Smart Parking Management System offers fast and automated access for both temporary and VIP users, reducing wait times and improving traffic flow. Temporary users enjoy flexible payment options, while VIPs benefit from quick, card-based entry and exit. The system enhances security by recording all activity, supports integration with CCTV and ANPR, and reduces staffing needs through automation. Its user-friendly design, accurate fee calculation, and scalable setup make it a cost-effective and efficient solution for any parking facility.

System Components :

- Entry & Exit Barrier Gates
- Card Dispenser & Card Reader
- Ticket Dispenser & Ticket Scanner
- Automated Payment Machines
- Central Management Software

Hardware Specification :

Model No	TS-TD-02
Applications	TCP,IP ports, Power supply ports
Cabinet Material	Iron plate metal 2.0
Display size	64*16
Working Temperature	-40 °C ~ 80 °C
Charactor Color	grey, yellow, red
Support Cards	IC/ID, RFID card etc
RFID card system	Ticket system
Main control board	LED display
Card dispenser(Entry)	Automatic printer (Entry)
Card Collector(Exit)	Bar code scanner (Exit)
Card reader	Card reader (optional)
